DETAILED ACTION

Priority

Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Europe on 25 June 2003. It is noted, however, that applicant has not filed a certified copy of the European application as required by 35 U.S.C. 119(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 6-9 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Seguenot et al.

There is disclosed in Seguenot a beverage making apparatus, comprising: a water supply structure T (col. 2, lines 40-45); a brewing arrangement 1 bounding a brewing chamber downstream of the water supply structure; a bounding member 5 in the brewing chamber; an adjustment structure 6 for adjusting the bounding member, the adjustment structure including a resilient member 34 and a locking member 17; and a dispensing channel 26 downstream of the brewing chamber; wherein the adjustment structure is configured to adjust in response to the quantity of particles which are presented in the brewing chamber.

In regards to claims 7-9, it is the opinion of the examiner that the adjustment structure of Seguenot is capable of performing the function recited in the claims.

In regards to claim 4 the water supply structure includes a base which can be considered displaceable away from the brewing chamber when the brewing arrangement is removed from the supply structure. This allows access to the brewing chamber.

Allowable Subject Matter

Claims 5, 10-12 and 18-20 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claims 13-16 are allowed.

Response to Arguments

Applicant's arguments filed 26 February 2009 have been fully considered but they are not persuasive. Applicant argues that the adjustment structure of Sequenot is not configured to adjust in response to the quantity of particles present in the brewing chamber. The manual adjustment of the size of the brewing chamber of Sequenot is dependent upon the amount of brewing substance to be placed within the chamber. This adjustment reads on applicants "configured to adjust in response to the quantity of particles present in the brewing chamber".

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
